

CT-20

Cashier Terminal

The CT-20 was designed with the cashier and facility operator in mind. Its user-friendliness and sophisticated solutions are unmatched.

Individually programmable keys can be set up for manual receipt, lost ticket and 16 validations. Not enough validations? 99 additional client accounts can be programmed. All this can be done directly via the 48 keys.

For small applications the CT-20 can be used as a stand alone unit. An entry ticket can be produced right from the cashier terminal.

Reports like Value and Time slot report, shift report and Z-Report (password protected) can be printed via the internal printer. No additional PC or printer is needed.

Standard:

- 2x16 Character backlit LCD display
- Built-in EPSON printer (2"1/4 paper width)
- Built in Magnetic Card Reader to accept credit and debit cards (additional software, communication line and bank account are needed)
- Up to 16 cashiers
 - Login via password or magnetic stripe card
- Controls up to 4 lanes
 - 8 additional units can be connected in a Master-Slave configuration to control more lanes
- Rates can be fully programmed (password protected)
- Integrates with the majority of proximity card readers

Optional:

- Cash drawer
- Barcode scanner
- External VFD customer display
- External receipt or ticket validation printer
